

BLA-LP28K

Features:

- Twistable F to easily change polarity
- Group K Protects 5G/LTE Channels 21-48
- Medium gain for good-medium signal
- Solid build, strong elements & rigid

The 20 Element Log-Periodic Group K Aerial is built for superior signal reception in strong signal areas. It features a "Twistable F" connector, ensuring the F-Connector always points downward for weatherproof connections. This aerial supports both horizontal and vertical polarisation, providing flexibility in installation. Specially developed to reduce issues with 4G and 5G interference without filters, it ensures a clear and uninterrupted signal. The aerial's universal bracket and durable construction make it a reliable choice for various setups.

Product	UHF, DAB or FM	Saddle & Clamp or F-Type	Aerial Group	Good, moderate or poor signal area
