

DFMO

Features:

- Both a DAB & FM aerial frequencies
- Receive signal from all directions
- Low gain aerial for good signal areas

The unique design of this aerial incorporates both DAB and FM capabilities, making it ideal for areas with strong reception. It combines both signals into a single cable connection for simplicity. The element design features solid plastic securing clips attached to a robust boom section, ensuring durability and stability. The mounting bracket is compatible with mast diameters ranging from 1 inch (25.4mm) to 2 inches (50.8mm). Each aerial is packed individually in a bag and comes with full instructions.
